

UPES Collaborates with SGRR University for Student Training and Joint Academic Initiatives

Dehradun, 22 May 2025: UPES, a leading multi-disciplinary university, and Shri Guru Ram Rai University (SGRR University), entered into a collaboration aimed at academic excellence and holistic student development. The collaboration establishes a strategic framework for mutual cooperation in areas of joint academic interest, with a special emphasis on experiential learning, student training, and knowledge exchange.

Together, both institutions will facilitate **institutional visits** to provide immersive learning experiences. UPES faculty and students will gain **exposure to real-world healthcare environments** through guided visits to Shri Mahant Indires Hospital, the School of Pharmaceutical Sciences, and the Shri Guru Ram Rai Institute of Medical & Health Sciences—all key constituents of SGRR University. In turn, SGRR University students will have the opportunity to explore UPES's advanced infrastructure in **Science, Technology, Engineering, Arts, and Mathematics (STEAM)**, engaging with faculty and participating in interactive, hands-on learning modules.

A strong focus of the collaboration is on **student training and development**. Specialised career counselling support will be extended to students from health sciences to help them explore and navigate diverse professional opportunities. Both universities are also exploring **joint knowledge initiatives** like faculty exchange and mentorship programs to build institutional capacity and promote cross-disciplinary engagement.

This collaboration marks a promising step in combining institutional strengths to drive academic innovation and student success.
